CRAYON ON WHITE PAPER

My name is Emily Jenson, and I am a senior at Science Leadership Academy. I am in 4 day a week senior art. It's a dream, I haven't had room for electives the past two years; the last time I had art was freshman year. I want to pursue art school. Applying is scary and putting a portfolio together is terrifying! And as a very self critical person, my final products are often narrowed down by my cynicism and lack of self confidence. Overall art can be frustrating and annoying, but ultimately it saved my life. I'm still learning everyday, even if I don't draw a single thing that day. I'm beginning to see the colors within colors, the blues and reds that make up an orange, or the symmetry in nature. Art is everything. I'm so excited for this year.

Enjoy
