My 2020 Experience

By, Daniel Trifka

What did I do during the Break?

This year has been so weird in many ways it feels like we skipped april and that just shows how boring the break actually was. But some of it was really fun because all I did was play with my friends on my PlayStation or Talk to my friends on Discord.

The games I played the most.

- Ghost of Tsushima
- FIFA 20
- NBA 2k 20
- Fall Guys
- Among Us
- Rocket League
- Rainbow 6 Siege
- Valorant
- And currently FIFA 21

I really like Among Us because it is a game where me and my friends can play and talk while at home.

What else did I do?

In the 6 month break I would also watch Tv Shows and movies and for some reason I would really like watching movies from the 2000's

What did I watch?

- Back To The Future 1, 2, and 3
- Avatar The Last Airbender
- Legend Of Korra
- Hunter X Hunter
- A couple Adam Sandler Movies
- And more

Also One show I really like is Avatar The Last Airbender. Because it is a short show that is very detailed and because of that it make the show feel longer and more entertaining.

I played sports.

Because of everything that has happened It was really hard to play sports because you were not able to go outside. So I played inside my house, because I had no space I had to think so I grabbed a laundry basket and started to play basketball in my house. But later into the break I would go outside and play soccer at the field.

My main goal of this break

At one point in the break me and a couple of friends would go to the field and train almost every week. We would train for soccer because we were all 8th graders at the time and we wanted to get better so we can play for our school teams. And that was my goal, to get better at soccer by training hard.

How has 2020 changed me?

For me 2020 was not as bad as it is for other people. Why it's because I was with my friends on the PlayStation so I never felt sad or depressed. But One thing really changed for me and they are Social skills, ever since the quarantine started I would always talk but know It's more wierd in class because it always feels awkward when I talk but for that I could only think of being more aware of my surroundings by not touching random things outside.
