

The Effect Of Covid-19

The global events have affected everyone in 2020. The event that I am going to be talking about that has affected me this year is the spread of Covid-19.

I have always been an inside person, so I am not upset about being inside all day. That doesn't mean I like this event though, since it is killing many people and ruining peoples' lives. I have it way better compared to a lot of people in terms of how Covid-19 affected me. This is because the worst thing about it is the online schooling. My eighth grade graduation wasn't normal and I am having a bad start of high school. I wanted to have a new start for high school because of my lack of motivation my previous years. I was actually going to put a lot of effort into school but online schooling shut it all down. I know Covid-19 isn't going to have a vaccine soon so I'll just have to push through barely.

The online schooling is affecting me badly but I can look on the bright side of other things that Covid-19 caused for me. Like I said earlier, I am an inside person, so I am able to play games, watch anime, and relax a lot. It is also nice that I am able to enjoy time with my cats a lot more. I am also lucky that my mom is still able to work and go to school.

In conclusion, the spread of Covid-19 has affected me, but not as badly as many others. I am able to find the pros and cons of it for me, but I hope it ends soon. I also hope that the person reading this is doing well.
