

## Normal 3-page Process Paper Requirements :

In the process paper, you provide us with a written version of the presentation requirements. Given that this should be a 15-minute presentation, expect to write approximately **three double-spaced pages**. Please use the following outline for structuring your paper:

### Section 1: Introduction

- What did you do?
  - I made a music video, for my capstone, not many people probably had this idea with them so i decided to use it myself.
- Why did you choose this project?
  - I chose to do this presentation, because gun violence is the thing that has started war, its the thing that killed many, and harmed all. Fighting gun violence is a thing that many would say is a must. One less bullet in someone skull is one more step to a happy world.
- How does your Capstone address the SLA core values?
  - My capstone addresses the core values, which are **inquiry, research, collaboration, presentation, and reflection,**

### Section 2: Process

- What are the steps you took to complete this capstone?
- What obstacles did you encounter and how did you overcome them?
- What resources did you tap into to complete your capstone?

### Section 3: Reflection

- What are you most proud of in this capstone?

I made a music video, for my capstone, not many people probably had this idea with them so i decided to use it myself. I chose to do this presentation, because gun violence is the thing that has started war, its the thing that killed many, and harmed all. Fighting gun violence is a thing that many would say is a must. One less bullet in someone skull is one more step to a happy world. My capstone addresses the core values, which are **inquiry, research, collaboration, presentation, and reflection**, Inquiry, I asked for information about gun violence, i asked google, asked around my town, i needed to know how this all affected people in some way, this is a crazy thing but i was willing to do it. Guns have taken more then given in this world. Research, I researched gun violence on the west and east coast and what i found out is shocking, did you know that On a per capita basis, there were 14.6 gun deaths per 100,000 people in 2021 – the highest rate since the early 1990s, but still well below the peak of 16.3 gun deaths per 100,000 people in 1974. The gun murder rate in the U.S. remains below its peak level despite rising sharply during the pandemic. This article by The Pew Research center gave all this data to us to show what has been happening in the world because of the gun violence actions that has become of everything.

Collaboration, was supposed to be one core value, but I collaborated with me, myself, and I, and nobody else to make this masterpiece. I worked hard on this so even if it may look half-assed I still put my all into everything, also some things were rushed. This project is a testimony to research, and how research shows us

what we want to see. Reflection, When i made this project i had to reflect on the many things i made, which would consist of the core values of reflection. Guns are a reflection of who was raised correctly and who wasn't guns shouldn't be the number 1 leading cause of deaths, next to sickness. This world is going to hell if we keep up this nonsense. How did i do my presentation, well first what i needed was an idea, an idea which could help me make a music video, the music video needed to have atleast a one shot of me, rapping, if i couldn't do that simple process then cant have a music video done, correctly. Most importantly is the camera work, i need to have substance, and actual meaning behind why i place the camera in a certain way. For this video i placed the camera specifically down below away from me, but let it roll the film, showing my face. With doing this i was able to get a good glimpse off how i look while i'm rapping. When i do this i'm supposed to look like i'm talking to the people and not my viewers, even tho my viewers can see that im talking, it makes a difference. The work that i do here will take me further in life, since i now have the skills to put even more things into rotation and i can show my willpower, to everyone who can see. When i was making this presentation, i've encountered a vast number of problems, like where to start, or how do i do something different from others. I had to use my brain to think around everything because if i didnt i would just be stuck in a endless, void of me not knowing what to do. How i over came them was a challenging matter, first i would use my resources that i had which would be my phone, and other

materials i used to make previous work, and then i would use my ever expanding knowledge to think of something that nobody else used. This is my life right, so i need to think for my self in these times of needs because if i dont i will be just trapped in my self isolation. Loathing at the fact that i cant get anything done in the time period that i need to get it all done, just like this process paper it took me a long time to get it done but i am slowly getting to the climax of what is needed to make my dreams of graduation possible. I had a lot at my disposal to make this the best it could be, but first i need a source, and root of all the important tuff that is needed to be dealt with in my presentation. This is my final work of art that i will be making for this school year so i will put my all into everything that i will try because if I dont then it will be a total flop and all my limitations will be realized in the end, and i dont want anything of the sorts to be shown out. I'm only human so working on this project might be the death of me (exaggerating) but its worth a shot. I hope you enjoy the presentation i give you as i'm nearing the end of my process paper soon enough i wonjt have anything left to write as i already finished everything else that i need to say to everyone. This was a journey but i'm ghlad i was able to get through to my objective and meet my goal, which was ever lasting, this project is going to be a masterpiece that i will remember as i get older. I will not forget about the school nor my adventure with the thing i called life. I feel like good things are coming, and after highschool this

will be my stepping stone to a better life. So again i thank you for letting me show you my work of art.
